

GOOD THINGS FOR THE ENVIRONMENT

If you cycle to school you will be
more healthy

If you turn off the tap when it is not in use you will save water

If we continue to burn fossil fuels we will destroy the earth's atmosphere

If we use or buy less plastic we will help the environment

If you leave electric appliances on standby you will waste electricity

If we continue to put plastic in the sea, marine life will be contaminated

If we cut down trees there will be less oxygen in the air

If you differentiate and recycle you
will help the planet

If we don't protect endangered species
the earth will be less beautiful
